DETAILED ACTION

1. Claims 4-11 and 21-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Is the vent in claim 1 the same "vent hole" in claim 6? Claims 21-22 depend from cancelled claims.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4-18 and 21-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luetngen et al. Luetngen et al discloses the invention substantially the same as claimed: metal base 18 or 47a, wall 12, vent hole 31 or 34, cap 14 or 16, etc. However, the reference does not disclose the walls being polymer and silicon gel. It is well known in the art and/or a matter of design choice that polymer has been used as semiconductor housings and silicon gel as encapsulants. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Luetngen et al by employing polymer for the house 12 and 14, depending on thermal coefficient expansion and other parameters desired in certain applications;

and by employing silicon gel to encapsulate elements 36 and 32 in order to protect them from harmful environment.

4. Applicant's arguments with respect to claims 4-18 and 21-22 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire **THREE MONTHS** from the date of this action. In the event a first response is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than **SIX MONTHS** from the date of this final action.

6. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

-Ishibashi, Takahashi et al, and Yamanaka are cited for their related inventions.
